

Ultrasonic Aroma Diffuser

Beautiful, Relaxing & Soothing

Nothing is more memorable than a smell. One scent can be unexpected, momentary and fleeting, yet conjure up a childhood summer beside a lake in the mountains.

-- Diane Ackerman, author, A Natural History Of The Senses

Aroma Diffusers and Humidifiers are the new essential must haves for all homes

Aromatherapy uses oils derived from plants to help improve a person's mental, spiritual and physical health using the natural healing power of herbs, flowers and plants.

Ultrasonic aroma diffusers disperse an ultra fine mist into the air full of essential oils held within micro-size water particles that allows the fragrance to not only last longer but also to be able to be more easily absorbed.

Ultrasonic aroma diffusers maximize the health benefits of aromatherapy by using all of the oils and by keeping them suspended in the air for a long period of time, while at the same time humidifying the air. Humidifying air has the added health benefits of keeping skin moist and hydrated as well as purifying the air you breath.

Simply add water with a few drops of your favourite essential oil and switch on.

This new wave generator uses **ultrasonics** to split the water into microscopic particles that carry any special aroma like a magical plume of mist, **mesmerising** to watch as it **gracefully rises** into the air, tension and stresses of everyday life just melt away. At night time it really comes into its own as you can see the **gorgeous soft lights** at their best. Let them change to different soft colours or choose your favourite and keep it on that. It's so **relaxing** you may even fall asleep safe in the knowledge that when the water has been there is an automatic cut off. No need to worry about **naked flames**; there are none; or the diffuser being damaged because of lack of water. It's environmentally friendly with extremely **low power consumption**.

Manufactured to the highest **quality** and latest modern **design**.

- * New beautifully sculptured, elegant design; looks great at home or in your work place.
- * Your all new ioniser meets all Australian design standards, putting you and your family's wellbeing first.
- * Auto shutoff when water runs out giving you complete peace of mind.
